

# LEAGUE OF ASSOCIATION TECHNOLOGISTS

## TECH LEAGUE 2025: YEAR IN REVIEW

What an incredible first year for the League of Association Technologists! Our community has shown up with passion and expertise, democratizing access to technology guidance across the association sector. Together, we've connected hundreds of professionals, from seasoned tech leaders to emerging voices, creating a vibrant network where innovation meets collaboration. Built entirely on volunteer dedication, this foundation positions us for an even more impactful 2026.

### Major Accomplishments

- **Launched Tech League as the new home for Ven-Con.** Evolved from a single event into a full community platform ([techleague.org](https://techleague.org)) dedicated to fostering collaboration among association technology vendors, consultants, and staff
- **Built essential infrastructure.** Established branding, launched [techleague.org](https://techleague.org) website, adopted a Commitment to Collaboration, and set strategic direction for 2026 with upcoming "Invest Wisely" webinar and expanded programming
- **Hosted successful hybrid programming.** Delivered both in-person events (April in Alexandria, VA) and virtual webinars, with 75% of attendees expressing strong interest in continuing both formats
- **Developed the Integration Bill of Rights.** Created and refined this groundbreaking framework through three public Town Halls (July, August, September), establishing clear expectations for responsible tech integrations
- **Expanded volunteer leadership.** Welcomed new Planning Committee members who participated in 2025 events, strengthening our leadership and broadening perspectives

Thank you to every volunteer who has given their time and expertise. You've turned a vision into reality, and the impact of what we're building will be felt across the association community for years to come. Here's to year one and to the exciting journey ahead!
